## Background

- We face limited resources and a demand for cancer care that will only increase in quantity and complexity in years to come.
- We need to find new ways to make the most of the resources we have.
- Improving the efficiency of cancer care must start with a clear understanding of what outcomes we are trying to achieve for patients.

# Waste must be challenged

20% of healthcare spending is wasted on neffective interventions<sup>1</sup>

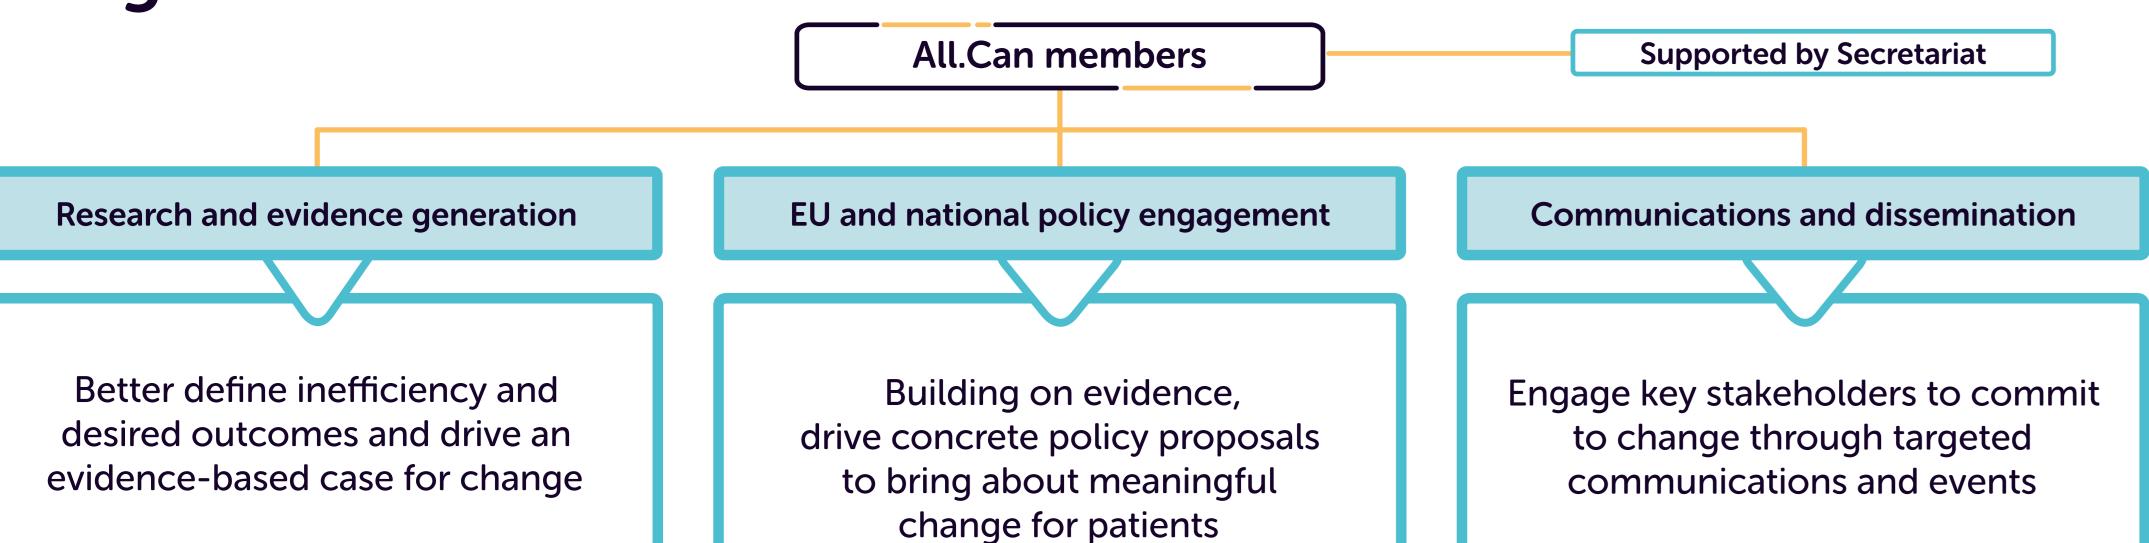

Waste is not just in terms of money, but time, quality of life, and missed opportunities for patients and their families

# Methods

- All.Can is a multi-sectoral initiative, established to create political and public engagement on the need to improve the efficiency of cancer care – focusing on what matters most to patients.
- All.Can works at an international level, and national All.Can initiatives also exist in several countries to drive national policy recommendations.
- All.Can includes patient organisations, policymakers, healthcare professionals, research and industry representatives from across Europe and Canada.
- Our activities include research, policy engagement and communications (Fig. 1).

## Fig 1. What we do

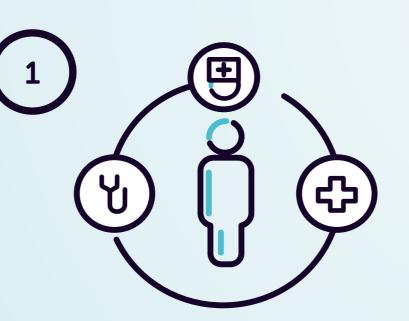

## Our guiding principles

- Everything starts with the patient. We need a better understanding of what really matters to patients in all aspects of cancer care.
- There are opportunities to improve efficiency across the entire care pathway – from screening, through diagnosis and treatment, to follow-up.
- Efficiency is about achieving the best outcomes possible with the resources we have. It's not about spending more, or less – it's about spending better.
- We need to focus on the 'how', and find ways to embed pragmatic mechanisms to improve efficiency across cancer planning, prevention and care.

### Our call to action

To drive better efficiency across the cancer care pathway, we must:

Focus on what matters most to patients

Create political will

#### Instil concrete mechanisms to create accountability

## Our research

- All.Can is working with Quality Health to conduct a comprehensive survey to gather insights from patients and caregivers on where waste and inefficiency occur most in cancer care (Fig. 2).
- These data will help identify the greatest opportunities to improve efficiency in cancer care, and focus policy efforts to make meaningful changes for patients and their families.
- All.Can is also working with the International Consortium for Health Outcomes Measurement (ICHOM) to measure efficiency in practice across a number of cancer centres (Fig. 3).

Patient survey on waste and inefficiency in cancer care

Healthcare professional survey

to 'mirror' patient survey

#### These data will give:

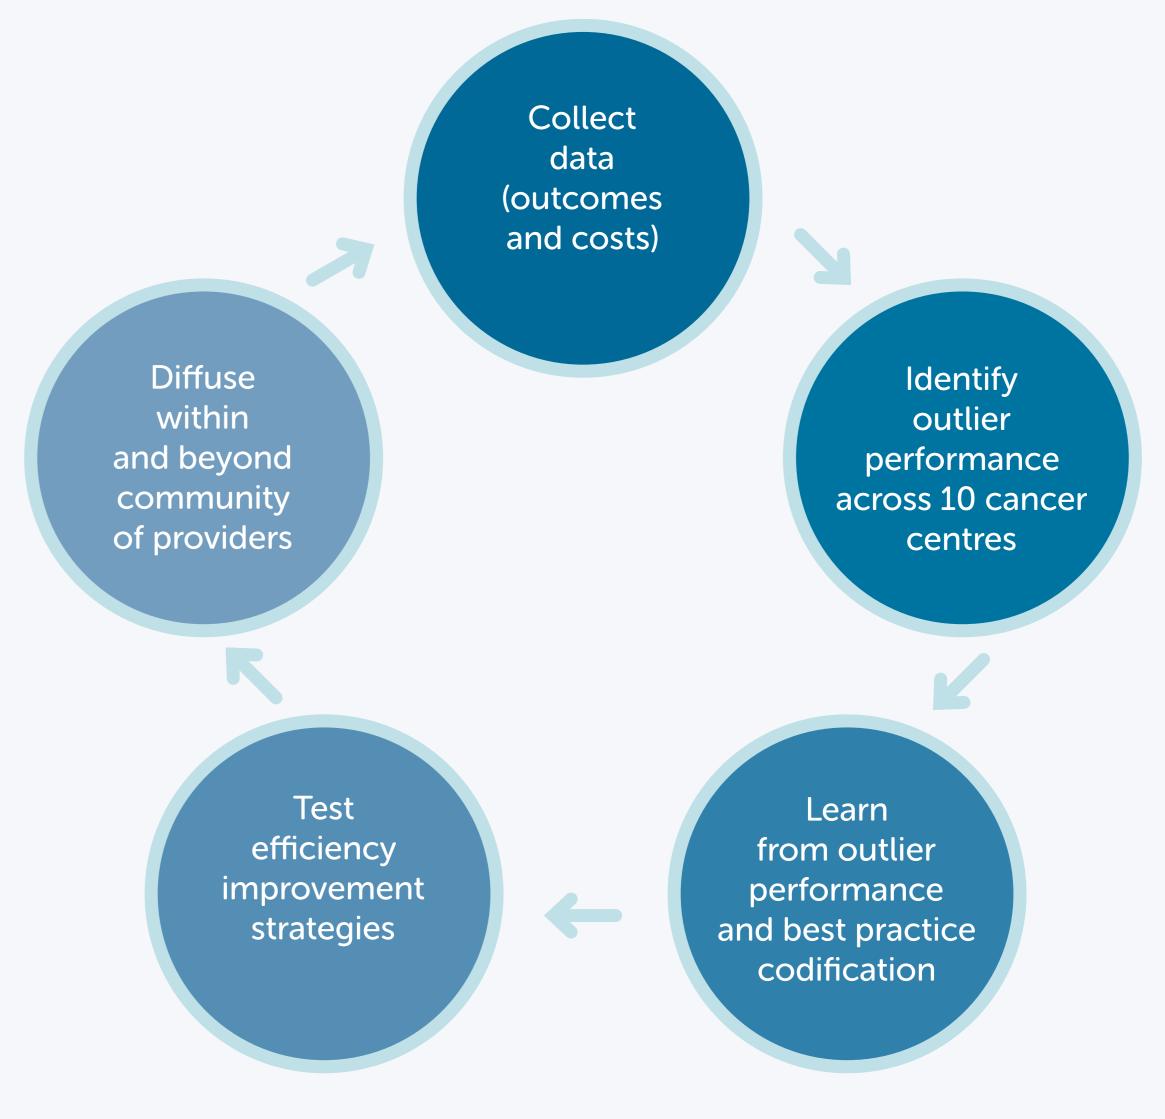

- patient-driven definitions of waste and inefficiency
- clarity on where greatest efforts are needed to make meaningful changes to patient outcomes

Policy engagement (national and EU)

 Policy recommendations for action

 Policy engagement tools for all stakeholders

# Fig 3. All. Can pilot looking at efficiency in practice

## Conclusions

- Improving efficiency across the entire cancer care pathway is a complex and pressing challenge that requires close collaboration between all stakeholders.
- Recognising the potential for greater efficiency in cancer care is simple. Implementation, however, is more challenging, and involves overcoming a number of system, technical, cultural and political barriers.
- Through its activities, the All.Can initiative aims to gather valuable data and engage with all relevant stakeholders to find pragmatic solutions to pave the way towards more efficient, and patient-focused, cancer care.

All.Can is a multi-stakeholder initiative involving patient, clinical, academic and industry experts as well as policymakers. We aim to help define better solutions for sustainable cancer care and improve patient outcomes in the future. The All.Can initiative is made possible with financial support from Bristol-Myers Squibb (lead sponsor), Amgen and MSD (co-sponsors). For further information about All.Can, please contact secretariat@all-can.org.
