Changing cancer care together

@AllCanBelgium #WeAllCan #changingcancercare

All.Can is a multi-stakeholder platform established to create political and public engagement on the need to improve the efficiency in cancer care. To do this, it focuses on what matters most to patients, and makes sure resources are targeted towards achieving these outcomes. All members contribute their time for free to the initiative, and all publications from the group reflect consensus of the members, who hold full editorial control.

The All.Can Belgium initiative is made possible with financial support from **Bristol-Myers Squibb (main founding and funding partner)**, **MSD Belgium (main founding and funding partner)** and **Roche (funding partner)**.

The secretariat of All.Can Belgium is provided by **hict**.

Introducing All.Can Belgium

- The origin of All.Can Belgium
- Why is All.Can Belgium unique?
- What is the focus of All.Can Belgium?

Governance model of All.Can Belgium

Why is All.Can Belgium unique?

Changing cancer care together

Multistakeholder approach

- | Patient representatives
- | Healthcare professionals
- | Health payers
- | Government
- | Health experts
- | Industry representatives

“An independent multi-stakeholder platform, to mobilise the Belgian cancer care community, in order to achieve relevant and ambitious projects with the aim of reaching a sustainable, efficient, innovative and patient-centred cancer care.”

Focus on innovation

“A seamless integration of **innovation in the healthcare system**, for better outcomes for all stakeholders, and first of all the patient.”

What is the focus of All.Can Belgium?

A more detailed reading can be found in All.Can Belgium's memorandum and vision document

Changing cancer care together

Waste in Cancer Care

What is **waste** in the cancer care system?

Over/ under participation to screenings

People not returning after diagnosis

Visits to hospital with no use

Unnessecary scans/tests

Excess medication

Lack of information sharing

Underuse of available support to patients

Fragmentation of data

Efficiency in Cancer Care

What are **efficiency gains** in the cancer care system?

Think of reducing waste, doing more or better with existing resources, ...

Vaccination coverage

Lifestyle

Screening coverage

Delayed treatment

Selectivity of patients

Savings from use biosimilars/generics

Choosing wisely

Better data for decision makers (BI)

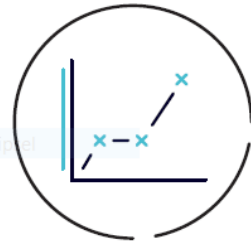

All.Can Belgium's memorandum and key asks

Patient centricity

Policy & organisation

Data & technology

Prevention

Screening

Diagnosis

Treatment

Follow-up

All.Can Belgium's memorandum and key asks

Overview of All.Can Belgium's key asks

1. All.Can Ask 01

Across all aspects of cancer care we must ensure that we are focusing on what matters most to patients

2. All.Can Ask 02

Work together to (re)design tools to inform and navigate patients and professionals in the fast-evolving cancer care environment

3. All.Can Ask 03

Build cancer care and support based on an understanding of the needs of patients and their relatives. Medical and non-medical follow-up should focus on doing what is needed with a minimal burden for the patient

4. All.Can Ask 04

Create a map of the Belgian cancer ecosystem that is understandable for a large audience and highlights where collaboration should be improved

5. All.Can Ask 05

Reinforce the Belgian Cancer Registry to build a strong cancer data system that is aligned with the overall health care data system

6. All.Can Ask 06

Belgian policymakers should develop a new cross-functional cancer roadmap with a vision on sustainable and innovative cancer care

7. All.Can Ask 07

We believe in prevent rather than cure by the "Health in all policies" principle. Reduce the life-style related risk factors of cancer

8. All.Can Ask 08

Find the right balance between "too much" and "not enough" in screening programmes and diagnosis of cancer

9. All.Can Ask 09

Give all patients when relevant access to game changing innovations to ensure effective and efficient treatment; and secure a reasonable growth in cancer care spending

10. All.Can Ask 10

We recommend multistakeholder dialogue as a constructive and effective way of mobilising the cancer care community and truly involve stakeholders in policy and decision making

Thank you!
